Contents

Preface 1

Material Removal

Finite element analysis for grinding and lapping of wire-sawn silicon wafers 2
W.J. Liu, Z.J. Pei, X.J. Xin

A curve matching image processing technique for analysis of coolant flow patterns 10
Y. Gao, S. Tse, Z. Tao, X. Xu

Improvement of electrochemical machining accuracy by using dual pole tool 15
D. Zhu, H.Y. Xu

Simulation and experimental analysis of super high-speed grinding of ductile material 19
J. Shimizu, L.B. Zhou, H. Eda

Study on the friction coefficient in grinding 25
G.Q. Cai, B.F. Feng, T. Jin, Y.D. Gong

The application of research on powder mixed EDM in rough machining 30
W.S. Zhao, Q.G. Meng, Z.L. Wang

State-of-the-art technologies and kinematical analysis for one-stop finishing of ϕ300 mm Si wafer 34
L.B. Zhou, H. Eda, J. Shimizu

High efficiency ELID grinding of garnet ferrite 41
F.H. Zhang, Z.J. Qiu, G.W. Kang, Z.J. Yuan, Y.S. Yang, X.K. Shi

Adaptive fuzzy control system of a servomechanism for electro-discharge machining combined with ultrasonic vibration 45
J.H. Zhang, H. Zhang, D.S. Su, Y. Qin, M.Y. Huo, Q.H. Zhang, L. Wang

Quantitative analysis of the loads acting on the abrasive grits in the diamond sawing of granites 50
X.P. Xu, Y. Li, W.Y. Zeng, L.B. Li

Experimental investigation into shaping particle-reinforced material by WEDM-HS 56
Z.N. Guo, X. Wang, Z.G. Huang, T.M. Yue

Computer simulation and optimization of metal cutting process for mild carbon steels 60
L.Z. Gu, D. Wang, L. Xing, J. Chang, G.J. Chen

Research on the influence of the cutting conditions on the surface microstructure of ultra-thin wall parts in ultrasonic vibration cutting 66
G.F. Gao, B. Zhao, F. Jiao, C.S. Liu

Theoretical generalization and research on the mechanism of the unsteady-state grinding technique 71
B. Lin, Z.C. Li, Y.S. Xu, J. Hu

Experimental studies on grinding forces and force ratio of the unsteady-state grinding technique 76
Z.C. Li, B. Lin, Y.S. Xu, J. Hu

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **http://contentsdirect.elsevier.com**

Elsevier Science B.V.

Development of diamond-coated drills and their cutting performance 81
M. Chen, X.G. Jian, F.H. Sun, B. Hu, X.S. Liu

Study on an end milling generation surface model and simulation taking into account of the main axle's tolerance 86
S.J. Li, R.S. Liu, A.J. Zhang

Research on a large depth-to-diameter ratio ultra-precision aspheric grinding system 91
M.J. Chen, D. Li, S. Dong

Optimization of honing wheel structure parameters in ultra-precision plane honing. 96
Y.B. Guo, Y. Zhang, J.A. Zhong, K. Syoji

Assessment of deformation of a shear localized chip in high speed machining. 101
N. He, T.C. Lee, W.S. Lau, S.K. Chan

Investigation of tool geometry in nanometric cutting by molecular dynamics simulation 105
X.S. Han, B. Lin, S.Y. Yu, S.X. Wang

Internet-based optimization and choice of insert grooves for face-milling 109
L.H. Dong, X.C. Xu, Z.J. Li

Method of monitoring wearing and breakage states of cutting tools based on Mahalanobis distance features 114
S.M. Ji, L.B. Zhang, J.L. Yuan, Y.H. Wan, X. Zhang, L. Zhang, G.J. Bao

Optimization design of grinding wheel topography for high efficiency grinding 118
Y.C. Fu, H.J. Xu, J.H. Xu

The simulation of grinding wheels and ground surface roughness based on virtual reality technology. 123
Y.D. Gong, B. Wang, W.S. Wang

High speed cutting of Inconel 718 with coated carbide and ceramic inserts 127
L. Li, N. He, M. Wang, Z.G. Wang

Study of synthesis identification in the cutting process with a fuzzy neural network. 131
B. Lin, M.Z. Zhu, S.Y. Yu, H.T. Zhu, M.X. Lin

Ultrasonic vibration electrical discharge machining in gas 135
Q.H. Zhang, J.H. Zhang, J.X. Deng, Y. Qin, Z.W. Niu

Surface modification process by electrical discharge machining with a Ti powder green compact electrode. 139
Z.L. Wang, Y. Fang, P.N. Wu, W.S. Zhao, K. Cheng

Experimental study on the machining of a shaped hole in Ni-based super-heat-resistant alloy 143
X. Wei

Frequency modulation of high-speed mill chatter 148
Y.X. Wu, J.A. Duan

Study on ceramic cutting by plasma arc 152
W.J. Xu, J.C. Fang, Y.S. Lu

Research on the cutting performance of carbon nitride cutting tools 157
X.H. Zheng, Q.X. Yu, J. Lin, M. Lu, S.Q. Pang

Relationship between the thermal shock behavior and the cutting performance of a functionally gradient ceramic tool. 161
J. Zhao, X. Ai, X.P. Huang

Analysis of material removal in alumina ceramic honing. 167
A.B. Yu, Y.S. Xu, S.F. Chen, B. Lin, B. Lin, X.L. Tian

Research on abrasives in the chemical–mechanical polishing process for silicon nitride balls. 171
J.L. Yuan, B.H. Lü, X. Lin, L.B. Zhang, S.M. Ji

Ceramics grinding under the condition of constant pressure. 176
J.Y. Shen, C.B. Luo, W.M. Zeng, X.P. Xu, Y.S. Gao

Analysis of the rotary ultrasonic machining mechanism. 182
G. Ya, H.W. Qin, S.C. Yang, Y.W. Xu

Study of the contact force in free-form-surfaces compliant EDM polishing by robot. 186
J.M. Zhan, J. Zhao, S.X. Xu, P.X. Zhu

Experimental study on the milling of a Ti Beta 21S 190
J.H. Xu, G.S. Geng

Design and manufacture of a shaving cutter with unequal depth gashes 193
M. Lv, X. Yang

Research on the characteristics of the cutting force in the vibration cutting of a particle-reinforced metal matrix composites SiCp/Al 196
C.S. Liu, B. Zhao, G.F. Gao, F. Jiao

Cutting temperature and tool wear of hard turning hardened bearing steel 200
X.L. Liu, D.H. Wen, Z.J. Li, L. Xiao, F.G. Yan

Experimental and theoretical research on 'local resonance' in an ultrasonic honing system 207
X.S. Zhu, K.W. Xu, B. Zhao, D.Z. Ma

Thermal aspects in the face grinding of ceramics 212
J.Y. Shen, W.M. Zeng, H. Huang, X.P. Xu

Experimental study on hard turning hardened GCr15 steel with PCBN tool 217
X.L. Liu, D.H. Wen, Z.J. Li, L. Xiao, F.G. Yan

Wear patterns and mechanisms of cutting tools in high-speed face milling 222
Z.Q. Liu, X. Ai, H. Zhang, Z.T. Wang, Y. Wan

Precision metrology of micro-workpieces on their tribological performance with an error compensation method 227
Y.M. Tao, Z.Q. Yao, L.Q. Liu, Y. Xie

Multi-parameter optimization and control of the cylindrical grinding process 232
G.F. Li, L.S. Wang, L.B. Yang

Study of a CNC grinding machining method using an isometric polygon profile 237
D.S. Wang, A.P. Zhou, Y.L. Yuan

Material Forming

A study on super-speed forming of metal sheet by laser shock waves 241
J.Z. Zhou, J.C. Yang, Y.K. Zhang, M. Zhou

Three-dimensional rigid–plastic finite element simulation for the two-roll cross-wedge rolling process 245
G. Fang, L.P. Lei, P. Zeng

Plasma jet imaging by CCD technology in rapid mold manufacturing 250
J.P. Xu, J.C. Fang, Z.G. Li

Study on the theory and application of the energy method for analyzing compressive instability in sheet forming 255
Z.Q. Xiong, L.S. Xie

Classification and analysis of tube hydroforming processes with respect to adaptive FEM simulations 261
L. Gao, S. Motsch, M. Strano

An investigation of laser-assisted machining of Al_2O_3 particle reinforced aluminum matrix composite 268
Y. Wang, L.J. Yang, N.J. Wang

A study on a 3D FE simulation method of the NC bending process of thin-walled tube 273
M. Zhan, H. Yang, Z.Q. Jiang, Z.S. Zhao, Y. Lin

A maintainability analysis visualization system and its development under the AutoCAD environment 277
J.P. Hao, Y.L. Yu, Q. Xue

Magnetic electrochemical finishing machining 283
J.C. Fang, Z.J. Jin, W.J. Xu, Y.Y. Shi

Plasma spray forming 288
J.C. Fang, W.J. Xu

Investigation into the electromechanical coupling unstability of a rolling mill 294
H.P. Tang, D.Y. Wang, J. Zhong

Numerically controlled rolling process of thick metal plate 299
J. Li, X.A. Yan, G.D. Wang, A.D. Jia

Research of the plastic status parameter and instantaneous clearance of a punching without burr 305
J.H. Li, H. Du, Y.S. Niu, X.L. Fu

Study of the compound polishing process on SnSb alloy moulds 310
Y.Q. Chen, S. Dong, H.L. Yu, L.M. Shi, J. Wang, P.A. Irnstovich

Application of data mining and process knowledge discovery in sheet metal assembly dimensional variation diagnosis 315
J. Lian, X.M. Lai, Z.Q. Lin, F.S. Yao

Visualization simulations for a cold press die 321
H. Liu, J.L. Yuan, J. Jin

A study of the stress and strain distributions of first-pass conventional spinning under different roller-traces 326
J.H. Liu, H. Yang, Y.Q. Li

Research on the casting–forging precision forming process of alternator poles 330
H.Q. Chen, Q.C. Wang, H.G. Guo

Multi-point forming technology for sheet metal 333
M.Z. Li, Z.Y. Cai, Z. Sui, Q.G. Yan

Material Behavior

Modeling of material removal rate in rotary ultrasonic machining: designed experiments 339
P. Hu, J.M. Zhang, Z.J. Pei, C. Treadwell

Calculation of the phase transformation kinetics from a dilatation curve 345
J.Z. Zhao, C. Mesplont, C.De Cooman

A study on the development of a composite ceramic tool ZrO_2/(W, Ti)C and its cutting performance 349
C.Z. Huang, L. Zhang, L. He, H.L. Liu, J. Sun, B. Fang, Z.Q. Li, X. Ai

Effect of die wall lubrication on warm compaction powder metallurgy 354
Y.Y. Li, T.L. Ngai, D.T. Zhang, Y. Long, W. Xia

Effect of grinding temperatures on the surface integrity of a nickel-based superalloy 359
X.P. Xu, Y.Q. Yu, H.J. Xu

Studies on the surface quality of the unsteady-state grinding technique 364
Y.S. Xu, J. Hu, B. Lin, Z.C. Li

Properties and applications of Ti-coated diamond grits 369
Y.H. Wang, J.B. Zang, M.Z. Wang, Y. Guan, Y.Z. Zheng

Fuzzy clustering analysis of the grinding burn damage level of a workpiece surface layer 373
P.Q. Ge, W.P. Liu, Z.C. Liu, C.H. Lu, J.F. Li

Improvement of a dicing blade using a whisker direction-controlled by an electric field 377
W. Peng, X.F. Xu, L.F. Zhang

Research on the vibration cutting performance of particle reinforced metallic matrix composites SiCp/Al 380
B. Zhao, C.S. Liu, X.S. Zhu, K.W. Xu

Densification model for porous metallic powder materials 385
Z.Y. Zhou, P.Q. Chen, W.B. Zhao, M. Shao, W. Xia

Cost-effective machining of granite by reducing tribological interactions 389
Y. Li, H. Huang, J.Y. Shen, X.P. Xu, Y.S. Gao

Research on diamond-enhanced tungsten carbide composite button bits 395
L.C. Duan, X.Y. Liu, B.S. Mao, K.H. Yang, F.L. Tang

A study on the prediction of the mechanical properties of a ceramic tool based on an artificial neural network 399
C.Z. Huang, L. Zhang, L. He, J. Sun, B. Fang, B. Zou, Z.Q. Li, X. Ai

Micro-structure detection of a glossy granite surface machined by the grinding process 403
H. Huang, Y. Li, J.Y. Shen, H.M. Zhu, X.P. Xu

Application of reaction sintering to the manufacturing of a spacecraft combustion chamber of SiC ceramics 408
M.H. Chen, L. Gao, J.H. Zhou, M. Wang

Effects of electron beam local post-weld heat-treatment on the microstructure and properties of 30CrMnSiNi2A steel welded joints 412
F.R. Chen, L.X. Liao, Y.F. Zhang, L. Zhang, F.J. Liu, G. Chen

Research on the working mechanism and virtual design for a brush shape cleaning element of a sugarcane harvester 418
S.P. Li, Y.M. Meng, F.L. Ma, H.H. Tan, W.X. Chen

A new shaping model for green ceramic balls 423
C.Z. Ren, Z.Y. Wu, X.M. Jin, C.J. Wang, Q. Xu

Effects of rare earth and sintering temperature on the transverse rupture strength of Fe-based diamond composites 427
Q.L. Dai, C.B. Luo, X.P. Xu, Y.C. Wang

Study on the semi-solid rheocasting of magnesium alloy by mechanical stirring 431
D.N. Li, J.R. Luo, S.S. Wu, Z.H. Xiao, Y.W. Mao, X.J. Song, G.Z. Wu

Fabrication and application of high quality diamond-coated tools 435
F.H. Sun, Z.M. Zhang, M. Chen, H.S. Shen

Study on the ground surface quality of Cr_2O_3 coatings 441
Y.F. Tan, P. Martin, C. Lescalier, O. Bomont, R. Bigot, J. Arzur

Experimental research on the residual stress in the surface of silicon nitride ceramic balls 446
C.Z. Ren, T.Y. Wang, X.M. Jin, H. Xu

A thermal elastoplastic model of the surface residual stress of ceramics grinding 451
X.L. Tian, A.B. Yu

Synthesis of B-doped diamond using graphite intercalation compounds (GICs) 454
J.B. Zang, Y.H. Wang, X.M. Zhang, H. Huang, Y.C. Zhao

Theoretical model of the transformation superplastic diffusion bonding of eutectoid steel 458
S.H. Lu, J.B. Yun

Frictional characteristics of mechanical seals with a laser-textured seal face 463
X.Q. Yu, S. He, R.L. Cai

A decision-making framework model of cutting fluid selection for green manufacturing and a case study 467
X.C. Tan, F. Liu, H.J. Cao, H. Zhang

The influence of inclusions on the fatigue strength of a ceramic bush 471
H.L. Yang, Y.L. Dai

Manufacturing Systems

An application of real-time error compensation on an NC twin-spindle lathe 474
J.G. Yang, Y.Q. Ren, Z.C. Du

A wavelet approach to determine the switching frequency for composite control during surface grinding 480
Y. Gao, Q. Chen, S. Tse, X. Xu

Experimental validation of the dynamic models of a high performance workpiece table under preloaded Hertzian contact 485
Y. Gao, S. Tse, D. Zhang, X. Xu

Automated sequencing and sub-assembly detection in automobile body assembly planning 490
Y.Z. Zhang, J. Ni, Z.Q. Lin, X.M. Lai

Color 3D reverse engineering 495
Z.Q. Xu, S.H. Ye, G.Z. Fan

Recycling strategy and a recyclability assessment model based on an artificial neural network 500
Z.F. Liu, X.P. Liu, S.W. Wang, G.F. Liu

Research of the optimization methods for mass customization (MC) 507
X.J. Gu, G.N. Qi, Z.X. Yang, G.J. Zheng

Transient temperature field analysis of a brake in a non-axisymmetric three-dimensional model 513
C.H. Gao, X.Z. Lin

Agent-based modeling and mapping of a manufacturing system 518
S.L. Wang, H. Xia, F. Liu, G.B. Tao, Z. Zhang

Construction of a realistic scene in virtual turning based on a global illumination model and chip simulation 524
T.Y. Wang, G.F. Wang, H.W. Li, J.B. Lin, Z.Y. Wu

Study on segmented reflector lamp design based on error analysis 529
H. Liu, J.L. Yuan

Instability mechanism of a rotating disc subjected to various transverse interactive forces 534
G.L. Xiong, H. Chen, J.M. Yi

A parallel search genetic algorithm based on multiple peak values and multiple rules 539
L.X. Guo, M.Y. Zhao

Creative design research of product appearance based on human–machine interaction and interface 545
Z. Wang, W.P. He, D.H. Zhang, H.M. Cai, S.H. Yu

Theoretical study on a non-transmission high efficient parallel camber grinding machine 551
Y.P. Li

Optimal design of the magnetic field of a high-speed response solenoid valve 555
G. Tao, H.Y. Chen, Y.Y. J, Z.B. He

Analysis and design of a cylindrical magneto-rheological fluid brake 559
J. Huang, J.Q. Zhang, Y. Yang, Y.Q. Wei

Multi-model technology and its application in the integration of CAD/CAM/CAE 563
X.Y. Xu, Y.Y. Wang

Study on the product description method for networked customization 568
S.X. Li, Y. Yang, F. Liu, S. Liu, K.Q. Zhou

The direct-error-compensation method of measuring the error of a six-freedom-degree parallel mechanism CMM 574
Z. Meng, R.S. Che, Q.C. Huang, Z.J. Yu

Research on the application of technology-oriented rapid response manufacturing in a distributed network environment 579
J.W. Jin, Y.R. Ni, J.T. Xi, F.Y. Fan, Y. Jin

A study of the precision factors of large-scale object surface profile laser scanning measurement 584
L.S. Wang, D.L. Lee, M.Y. Nie, Z.W. Zheng

Research on a fault monitoring system in free-form surface CNC machining based on wavelet analysis 588
S.X. Xu, J. Zhao, J.M. Zhan, G. Le

Immersive virtual product development 592
J.S. Bao, Y. Jin, M.Q. Gu, J.Q. Yan, D.Z. Ma

Research on an intelligent manufacturing system based on an information-localizing machining mode 597
K. Zhou, J.S. Zhao, D.Z. Mao

Hyperbolic error analysis and parametric optimization of a round body form tool 603
Y.Y. Zheng, X. Li, L.F. Zhao, A.H. Gao

The CAD/CAM solution and its realization for the machining of the rail girders in the Maglev transrapid project (MTP). 607
Y.Q. Zheng, B.S. Chen, W.M. Zhang, L.Q. Fan

A new integrated design method based on fuzzy matter-element optimization 612
Y.W. Zhao, G.X. Zhang

Modeling approach of regression orthogonal experiment design for the thermal error compensation of a CNC turning center . . . 619
Z.C. Du, J.G. Yang, Z.Q. Yao, B.Y. Xue

A universal modeling method for enhancement the volumetric accuracy of CNC machine tools. 624
J.W. Fan, J.L. Guan, W.C. Wang, Q. Luo, X.L. Zhang, L.Y. Wang

Research on flexible transfer line schematic design using hierarchical process planning 629
G.W. Zhang, S.C. Zhang, Y.S. Xu

Active vibration isolation of a micro-manufacturing platform based on a neural network 634
C.L. Zhang, D.Q. Mei, Z.C. Chen

Agility evaluation of mass customization product manufacturing 640
S.L. Yang, T.F. Li

The processing of parts with group technology in an individual CNC machining center 645
B.Z. Gong

3D design and analysis of the crushing roller of a high-pressure grinding roller. 649
H. Gao, L.G. Qu

The measurement and control of diameter in large-scale part processing 653
G.Y. Zhang, X.P. Xu, X.H. Fu, L. Yang, C.Z. Li

Research on a dispersed networked CAD/CAM system of motorcycle 658
X.K. Wang

Fuzzy–grey prediction of cutting force uncertainty in turning. 663
W.P. Wang, Y.H. Peng, X.Y. Li

Research on an ultrasonic NDT system for complex surface parts 667
H.W. Ma, X.H. Zhang, J. Wei
